Ankit Shastri

Sr.QA Automation Engineer at Minted
Greater Toronto Area, Canada

Summary

#Over 10 years of strong experience with certified ISTQB in quality
assurance and automation testing.Develop and maintain Selenium
web driver Framework/s using Java,TestNG,Eclipse, Jenkins.Also,
having in-depth level of working knowledge on ecommerce,real
estate,capital market and financial related web based,client/server
and mobile application using agile process.

Summary Highlights

#Well versed in developing Automation Test Scripts for assigned
user stories using Selenium Web Driver, Java and Rest API.
#Good experience in working with Page Object Model Framework
using Selenium with Java.
#Hands on experience in developing BDD framework using
Cucumber with Java.
#Expertise in locating web elements using XPATH and CSS
selectors.
#Having experience with GIT version control system.
#Experience in writing test cases and maintaining test scripts as per
the business specifications/ functional requirements.
#Hands on experience of database validation or getting through data
using db util method and automation scripts.
#Having knowledge of different bug tracking tools like Jira, Rally and
TestRail.
#Hands on experience with all phases of Software Development Life
Cycle (SDLC) and Software Test Life Cycle (STLC) and also well
versed with Agile/Scrum methodologies.
#Perform Regression, Smoke, Integration and Functional Testing.
#Handled many challenging issues while creating, executing and
debugging selenium scripts.
#Automated AI based application using open source automation
framework - WebdriverIO (Java script), Mocha and Chai
#Excellent problem solving skills with strong technical background.

Experience

Minted
6 years 11 months

Sr.QA Automation Engineer
January 2018 - Present (4 years 3 months)
Toronto, Ontario, Canada

- Highly dynamic Agile methodology and participated in scrum & sprint meetings
- Developed page object model automation framework in Selenium + Webdriver using Java and business data driven approach (BDD) for Minted Application
- Analyze the requirements and prepare automation scripts scenarios
- Proficient in creating Continuous Delivery Pipeline infrastructure using Jenkins
- Implemented overall QA process (i.e. product release/testing cycle, Bug tracking system and reporting procedure)
- Developed automation test scripts, executed these test scripts and logged defects in JIRA
- Review automation code and design readme file to checklist through Github workflow process
- Created backend - XML / database test validation using automation framework and handle API request results
- Designed fulfillment smoke and building up regression suite integration with CI / CD tool
- Automated Restful functional services test using Rest based API service using Java method
- Supporting release management process by delivering feature to Production

QA Automation Engineer
May 2015 - December 2017 (2 years 8 months)
Winnipeg, Canada Area

InfoStretch Solutions Pvt Ltd
QA Lead
November 2008 - April 2015 (6 years 6 months)
Ahmedabad
